

Unified Endpoint Management - Made Simple

About FileWave

Since 1992, FileWave has provided business, education, and government customers with industry-leading unified endpoint management software to effectively secure and manage devices, applications, and content from one easy-to-use console. With offices throughout the USA and Europe, FileWave provides worldwide support, when you need it.

Key Components

- Multi-Platform Management**
macOS, iOS, Windows, Chrome OS & Android
- Multi-Platform Imaging**
Direct, network & layered models
- Patented File-Level Deployment**
Deploy anything, any time, at any level
- Asset Management**
Know what you have & what it's doing
- True Self-Healing Technology**
Auto-repair broken installations
- License & Content Management**
License, app & usage reporting
- End-User Self-Service Kiosk**
Direct, network & layered models
- Device Discovery, Tracking & Security**
Discover, locate and protect devices
- Highly Scalable Infrastructure**
Booster technology reduces network traffic
- OS & 3rd Party Patch Management**
*Windows/OS X updates
 3rd party (Java, Flash, MS Office, etc.)*

All-Inclusive Management Features

- ✓ **Patented File-Level Distribution**
Provides granular control
- ✓ **Tiered Administration**
Custom control for multiple administrators
- ✓ **Multi-Platform Imaging: OS X & Windows**
Direct, network & layered models
- ✓ **Deployment Options**
Filesets, MSI, PKG, EXE, scripts, plists & more
- ✓ **End-User Self-Service Kiosk**
User specific, on-demand content & updates
- ✓ **Content Management**
License, app & usage reporting
- ✓ **Integrated Inventory**
Asset & License Management
- ✓ **Device Discovery & Tracking**
Discover & track devices
- ✓ **Self-Healing Technology**
Automatically repair damaged installations
- ✓ **Device Security**
Protect data, devices & enforce encryption
- ✓ **System Updates/Patch Management**
OS updates (Windows, macOS & iOS)
3rd party updates (Java, Flash, MS Office, CS, etc.)
- ✓ **LDAP Integration**
AD, OD & E-Directory
- ✓ **Profile Management**
Eliminate the need for multiple tools
- ✓ **OS Updates - Same Day Support**
Same day support ensures you're always covered as new OS version are released from Apple & Microsoft
- ✓ **Flexible Training**
On-site, Remote & FileWave Training Center
- ✓ **Dashboard & Reporting**
24/7 monitoring of critical systems & services
- ✓ **ENGAGE Classroom Management**
Eyes up front, single app mode, clear passcode, device mirroring, content sharing & more
- ✓ **Enterprise Scalability**
Booster Technology minimizes WAN/VPN traffic
- ✓ **Resume Interrupted Deployments**
Auto-resume installations upon re-connection
- ✓ **RESTful API**
Easily connect with FileWave's inventory database
- ✓ **Cross-Platform Remote Control**
Built-in NAT traversal for easy viewing and control
- ✓ **Schedule Deployments**
Install, activate, deactivate & uninstall
- ✓ **Auto Enrollment: OS X & iOS**
DEP, LDAP, etc. (over-air Supervision)
- ✓ **Managed Distribution**
VPP Codes, License Assignment & Device Assignment
- ✓ **Security Reports**
Profile removal, App installations & non-authorized downloads
- ✓ **Inventory-based Smart Groups**
Create rule-based deployments
- ✓ **Schedule Restrictions**
Create time-based profiles
- ✓ **Multi-Platform Infrastructure**
Mac, Windows, Linux, VM, Hosted
- ✓ **ASM & Apple Classroom Integration**
Leverage Apple services with FileWave
- ✓ **Free & Fully Supported Evaluations**
Dedicated Systems Engineer & access to worldwide staff
